

PRESS RELEASE

Cable Telephony Industry Finds Sittelle Technologies Inc. Delivers On Its Reliability Commitment

New five-year warranty helps Sittelle partners better serve the cable telephony industry

For Immediate Release

ST-HIPPOLYTE, Quebec Canada/EWORLDWIRE/HOLD --- Beginning Aug. 1, 2009, Sittelle Technologies Inc. IVI6000 and RPS3001 products - which support the cable telephony industry and the partners that serve it - are accompanied by a new five-year hardware warranty. The extended warranty provides even stronger assurance to buyers that they're purchasing the most reliable equipment on the market.

While Sittelle products have always been designed for reliability, the company's use of MIL-STD methodology - a standard more demanding than Telcordia reliability standards used extensively throughout the telecommunications industry - further highlights Sittelle's position.

"For years, we have been telling customers our products are very reliable. Now we are putting our money where our mouth is and giving customers proof of our commitment to products that just keep on working year after year," said Mr. Claude Arpin, engineer, president and CEO of Sittelle Technologies Inc.

About the IVI6000

The IVI6000 Intercom Interface is a tiny, easy-to-install device that switches all phones in an apartment to the intercom and back. Tenants can answer an intercom from the nearest phone when they have digital phone service from a cable company.

About the RPS3001

The Remote Porting Switch (RPS3001) allows cable companies to install digital phone service on-demand. The RPS3001 is an easy-to-install device that automatically switches all digital phone phones in the home to the digital phone service when the porting of the phone number is completed.

About Sittelle Technologies Inc. (<http://www.sittelletech.com>)

Sittelle Technologies Inc. designs solutions, and it develops and manufactures products for the telecommunications markets. Sittelle solutions are efficient, easy to implement, and economical, helping Sittelle customers realize a solid return on investment.
